InstaSafe
Cloud. Secure. Instant.

ZERO TRUST IDENTITY AND ACCESS SECURITY

ZERO TRUST NETWORK ACCESS · ONE CONSOLE

One Zero Trust *platform*

VPN, SSO, MFA, device posture, identity access management and audit replaced by one Zero Trust platform. Up to 70% lower cost than buying and stitching them together.

See the whole platform

MAKE IN INDIA

ISO 27001·SOC 2 · NISTSP800-207·Make in India

THE PLATFORM

One console. *Every control.*

25 device checks

8 auth profiles

6 MFA methods

7 app types

202 event types

Zero Trust Network Access

Zero Trust Application Access

Multi-Factor Authentication

Single Sign-On

Identity & Access Management

Device Posture & Binding

Conditional Access

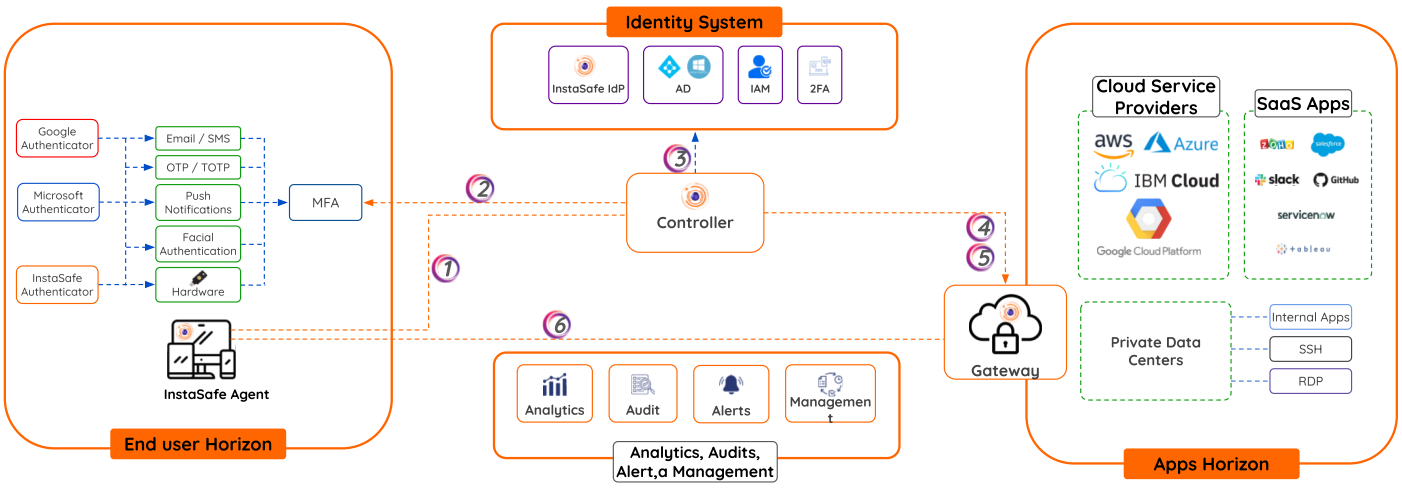

AI Endpoint Controls

DNS Filtering

ALSO INCLUDED

Secure Enterprise Browser · Always-On Connectivity · Domain Joining · The Trust Engine · Passwordless Auth · SAML · OIDC · RADIUS · SIEM export · 11 built-in reports · AI - MCP Ready

SOLUTIONS & INDUSTRIES

Banking & Financial Services | NBFC & Digital Lending | Fintech | Insurance | Manufacturing | Energy & Utilities | Government & PSU | Education | IT / ITES | BPO & Contact Centres | Healthcare & Pharma | Logistics & Supply Chain | Real Estate & Construction | Retail | SaaS & Digital Native | B2B E-commerce

SOLUTIONS

Everyone of them is the same check, pointed at a different problem.

VPN Alternative
Runs along side theVPN you have, app by app, until there is nothing left to switch off.

Legacy Application Access
Thick-client ERP and client-server systems that never worked behind a web proxy.

Secure VoIP Access
Publish the call directly and keep the latency budget you started with.

Hybrid & Work-From-Home
The same access whether the desk is in the office or at home.

Third-Party & Vendor Access
A contractor gets one application,for a window of time, on the record.

Privileged Access
RDP and SSH brokered and recorded, with no standing credentials on the box.

Secure Database Access
The database reached by entitlement, with the session logged.

Clientless Remote Access
AnyOS,anybrowser,nothingto install on the desk.

VDI Alternative
Publish the application instead of a whole desktop. No image to build, no farm to size.

Secure Cloud & Multi-Cloud
AWS, Azure, Google Cloud and IBM Cloud governed from one policy console.

Secure Remote Access
One user, one session, one application. No network behind it to wander into.

BYOD Security
Unmanaged devices checked before entry, and governed once they are inside.

M&A Access Integration
Give a new entity access without merging two networks first.

DevOps Security
GitLab,Jenkins,bastions and build farms, granted by group not by subnet.

Compliance & Regulatory
Every access decision written down and exportable to what you already run.

PQC Compliant
Prepare access infrastructure for the post-quantum era with cryptographic controls designed for evolving security requirements.

TRUSTED & RECOGNIZED BY

CSA cloud security alliance® | Gartner | 50 Technology Fast 50 INSTASAFE WINNER Deloitte. | Deloitte. Technology Fast50 | DSCI Excellence Awards 2021

Ditch the VPN. *Keep your apps invisible.*

Runs along side the VPNyou have,app by app,until there is nothing left to switch off.
Nothing to rack, no network to re-architect.
